

# APU Start Switch

Q-Tron Part No. Q-88196/13  
Product Information Sheet

**APU Start Switch**  
**Q-Tron Part No. Q-88196/13**

Figure 1. APU Start Switch application

## ***APU Start Switch Specifications***

Q-Tron Part No.: Q-88196/13  
Configuration: Typically wired for Normally Open (NO) operation.

## ***Operations***

Used in conjunction with the Engine Run Manager (ERM) system, the APU Start Switch allows the operator to start the Auxiliary Power Unit (APU) at anytime. While running, the APU can be used as an air conditioner or for another use.

### **To manually start the APU:**

Press the APU Start push-button, located on the control stand. Pressing this button starts the APU, which runs until the 2-hour operation timer expires.

## ***Mounting Instructions***

Mount the APU Start Switch push-button on the control panel within easy reach of cab personnel. Refer to Figure 1 for mounting illustration.
